## Sorento

A large SUV that puts the focus firmly on family and luxury. The Kia Sorento is more spacious, more versatile, with class-leading innovations wrapped in finely tailored style. It's not only the most high-tech Kia car ever made, but also leads the way in SUV design.

## "refined boldness"

We wanted to make the new Sorento look strong and firm at the front, but slender and sleek from the side. The side character line did all the magic. Traditional SUVs have a strong-looking, box-like back for its horizontal character lines. The character line of Sorento, however, looks arch-like, just like that of sedans. This makes the overall look sleek, despite the angles all over the body. The concept of refined boldness inspired our designers, who sought to maintain the robust, tough-looking aesthetic of earlier generations of Sorento, while applying a greater degree of refinement and elegance and a sense of sportiness.

Panoramic Sunroof

Blind Spot View

- 1–Transport your passengers safely with class leading safety tech. The Blind Spot View Monitor<sup>7</sup> activates as you turn your indicator on ready to change lanes, actingas another pair of eyes on the road to safely merge, showing a live camera feed on your dash gauge cluster in HD clarity.
- 2–Centre Collision Airbag A segment first, the front centre side airbag is built into the left side of the driver's seat and deploys during a side impact to minimise the chance of head clash between the two front seat occupants.
